

New in CARA

February 14, 2026

Dark Web Report, Product Explorer, and more.

Dark Web Exposure Report: Portal Release

We have added support to generate a dark web report for any given domain present in the user's workspace. CARA scans the dark web for exposed credentials, validates their status via Microsoft Entra ID, and creates a case with the report attached. Users will get the dark web report without Microsoft Entra ID validation if the integration is disabled.

Create a dark web exposure report for resourceinn.com from 2025-10-01 to 2025-11-14.

1:53 PM

D

Generating Dark Web Report for resourceinn.com.

Dark web monitoring from 2025-10-01 to 2025-11-14 is in progress. This process may take more than a minute.
I have found credentials associated with resourceinn.com exposed on the dark web. Further analysis is underway.
I am validating the status of exposed credentials via Microsoft Entra ID. Please wait.
Case SRC-5555 has been created with the dark web report attached.

Feature Enhancements on Pre-Prod

CARA now allows users to select a specific domain from their workspace when generating a dark web report. If multiple domains are selected, the report will be generated for the first domain only. Users can also choose whether Microsoft Entra ID validation is required.

Create a darkweb report from 2025-02-01 to 2025-02-15.

Product Exploration: Pre-Prod Release

CARA can now assist users in exploring the product directly from its interface, enabling users to ask queries about the product seamlessly. Please note that the user must first invoke the Product Explorer. CARA currently supports single-action queries only. Expect further enhancements as we expand CARA's exploration capabilities in the upcoming release.

Can you please invoke product explorer?

5:21 PM

D

Product Explorer Mode activated. I'm ready to assist with any product-related queries for your system.

5:21 PM

Where can I find the SAML applications?

5:22 PM

D

I've pulled together everything you requested. Give it a quick look.

5:22 PM

The Applications tab allows you to configure and manage SAML-based applications for secure SSO. By integrating SAML applications, users can authenticate once and access multiple services without repeated logins.

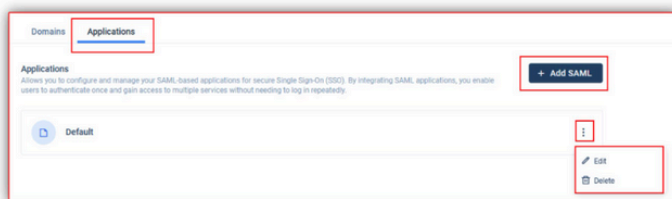

Figure 34: Authentication – Applications

What does the actions stats dashboard provide?

5:22 PM

D

I have successfully retrieved the requested information. Here are the details:

5:22 PM

The Action stats dashboard provides insights into how well the system is performing in terms of preventing and detecting threats simulated by strikes.

Where are the active integrations listed?

5:23 PM

D

Please find the requested information down below:

5:23 PM

The Premium Integrations tab provides the list of the added integrations and the enabled features of each integration. The status of the added integration, its version, the zone where it is added, the enabled features, date, and time of adding and updating an integration are portrayed on the list.

The following options are available against all added integrations available on the Premium Integrations list:

- Edit : You can edit the deployment configurations and enable/disable features as needed.
- Disable/Enable : You can enable/disable an added integration according to requirements.
- Delete : Clicking on this option removes the integration from the list.
- Help : By clicking this option, you can access and download the helping manual elaborating on the integration setup for each integration.

Integration	Status	Version	Zone	Features	Added At	Updated
SendGrid ESP	Enabled	1.0.0		SendGrid, SendGrid API	04/03/2024	04/03/2024
SendGrid ESP	Enabled	1.0.0		SendGrid, SendGrid API	04/03/2024	04/03/2024
SendGrid ESP	Enabled	1.0.0		SendGrid, SendGrid API	04/03/2024	04/03/2024
SendGrid ESP	Enabled	1.0.0		SendGrid, SendGrid API	04/03/2024	04/03/2024

Where can I find the active services?

5:23 PM

D

Well, that wasn't hard. Here's the information you asked for:

5:23 PM

The Services section provides a summary of applications and platforms associated with the user's identity, offering visibility into their usage patterns and access activities.

Identity provider	Associated Risk	Services	Endpoints	Activity logs
All	Okta	Microsoft Entra ID		
App 10	Identity provider	Last login	Last location	IP
Test App				
Bitbucket Cloud				
Sophos				
Tamp app				
test				
Sophos Email Mail Flow				
Report Abuse Plugin		04/13/2024 11:39 AM	Smith	28.61.38.103
